Calcium & Vitamin D3

Citrus Burst with natural flavors, our Calcium plus Vitamin D3 Gummies are a delicious way to support strong bones and teeth. While calcium is well-known for its ability to promote bone health, it also plays a role in muscle contraction and nerve function. However, taking calcium on its own may not be as optimal as taking it alongside vitamin D. In addition to supporting a healthy immune system, vitamin D assists with your body's ability to absorb calcium which is why both nutrients are included in our tasty Calcium plus Vitamin D3 Gummies.
